Trade Insurance

Trade insurance is for those who trades crypto currency on Short / Mid / Long term basis on the selected crypto currencies can be assured.

In such insurance an upper & lower limit of 30% bare minimum would be considered and the insured amount would be calculated as below:

For E.g.: John would like to insure 1 BTC in mid term trade insurance of which current price is \$ 9000 & he selects range of 40% as his risk from the current price.

Insured Amount

$$\frac{\text{Upper Limit} + \text{Lower Limit}}{2} + 40\%$$

Premium for the same would vary from 3% to 8% depending upon the risk associated with this selected crypto currency & volatility at that time.

The insured amount would be x% of initial amount.

The user can define type of insurance under the section trade insurance and can select duration, quantity & range in percentage.

In Such insurance initially we offer BTC, ETH, XRP, BCH & more currencies would be added using decentralized voting method, once the currency meets the minimum vote cap we would evaluate it & list it within 7 working days.

Owing standard ethics we won't provide insurance to our own currency & few other crypto currencies.
